Drive improved productivity and profitability

The RICOH Pro L5100 Series Wide Format Latex Printer is designed for demanding production environments that require the versatility of a high-speed system with superior capabilities suitable for both durable outdoor signage and high-resolution indoor graphics. Deliver exceptional image quality, vibrant colors, high opacity whites and rich blacks with a maximum resolution of 1,200 × 1,200 dpi. This system supports media up to 64" wide and features three staggered Ricoh industrial-grade printheads for years of predictable, precise results. Print at speeds up to 46.7 m²/h in production mode and for jobs that require fine detail at a close viewing range, operate at speeds up to 25 m²/h. Ricoh's AR2 Latex Inks are instantly dry and scratch resistant, ready for immediate finishing and handling. Offering easy operation and automated daily maintenance, the RICOH Pro L5100 Series enables your business to keep pace with tight deadlines and seasonal demands.

It's all about the applications

From traditional signage to cutting-edge applications, the RICOH Pro L5100 Series allows you to integrate true media versatility with high image quality to help you maximize profitability. Expand your customer base with support for posters, banners, signs, decals, window graphics, vehicle graphics, POP displays, floor graphics, textiles/soft signage, wall coverings, fine art prints, packaging proofs and more.

Take advantage of fast-cure latex inks

Ricoh's second generation AR Latex Inks are cured and scratch-resistant as soon as they exit the printer, ready for immediate finishing or installation. Unlike solvent inks, there is no out-gassing required. Ricoh's GREENGUARD-certified latex inks have a very low odor and require no special ventilation, making them safer for your operators, customers and the environment. These latex inks are ideal for installation in locations where prints utilizing solvent-based inks are unsuitable, like healthcare, hospitality and education facilities.

Rely on industrial-grade printheads

The RICOH Pro L5100 Series utilizes Ricoh's industrial grade MH5441 printheads designed for an extended service life while ensuring day-one image quality over time. Variable-drop volume capability allows the creation of a range of drop sizes for stunning images, sharp text and smooth tonal transitions.

Deliver superior image quality with CMYK or CMYK plus white printing

Drive repeat business by delivering vibrant colors, and rich, dense blacks. Variable-drop technology ensures sharp, accurate text, natural skin tones and smooth gradations with a maximum resolution of 1,200 × 1,200 dpi. Configure the RICOH Pro L5100 Series with white ink to expand your capabilities to clear and colored media. Flood white ink to make colors pop, use white as an eye-catching spot color, or take advantage of white as a mid-layer for day/night applications.

Media versatility for more profitable applications

The RICOH Pro L5100 Series can handle a wide variety of traditional signage substrates and offers support for 2-inch and 3-inch roll cores up to 55 kgs. Print on pressure-sensitive vinyl, banner, canvas, paper, backlit/clear films, textiles and more. Broaden your revenue streams when you have more media choices for indoor and outdoor installation. Increase your bottom line and capture more of the market with high-margin applications for retail, events, trade shows, seasonal promotions and more.

Automate PDF workflows for ultimate control

RIP jobs fast, automate repetitive tasks and make it easier to get from PDFs to a finished product. Onyx RIPCenter software comes included with the RICOH Pro L5100 Series and provides a full 64-bit platform with the latest Adobe® PDF Print Engine and a proprietary color engine featuring color-managed previews to help ensure what comes out of the printer matches your expectations. Get up and running in minutes with an intuitive interface and tools to help you streamline job prep, reduce errors and minimize material waste.

Simple to use, easy to maintain

The RICOH Pro L5100 Series features a large, intuitive color touch panel for easy operation and features a pull-out media feed system for ease of use when loading media. Maximize uptime and performance with the automated daily maintenance system, reducing operator intervention and ensuring reliable consistent results. Unattended device management is made simple with the optional Attention Light, that can be seen from virtually any view in your shop, or remotely access job processing status, remaining media and network settings with Web Image Monitor for optimal performance.
